

Action For a Positive Reaction!

Summer irrigation quadruples average monthly water demand. Three of our wells recently have been taken off-line and will remain off-line until early 2022.

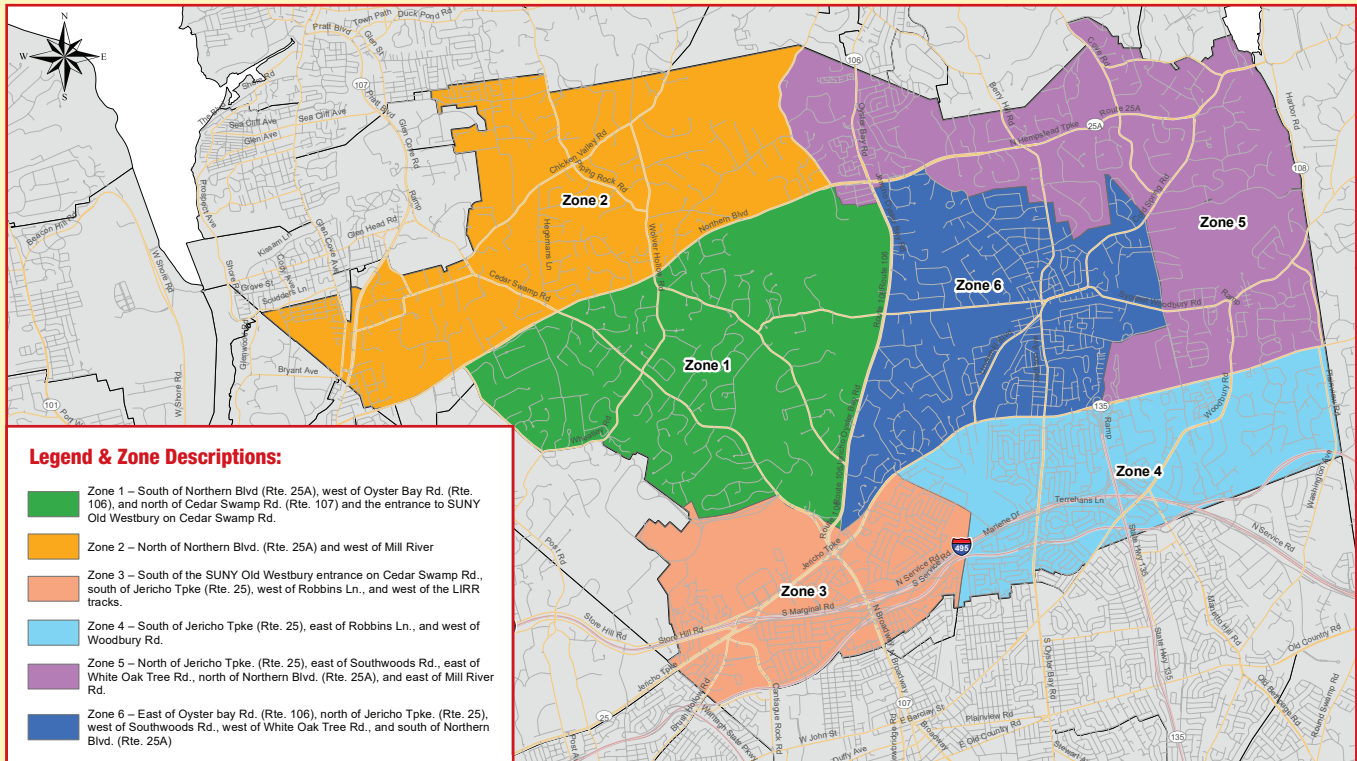

Therefore, water conservation is a must.

4 Important ways you can help us get through this rough time and avoid water shortages.

- 1. Cut back watering times** for each zone by **5 minutes**. This will save 20% or more on overall usage.
- 2. Follow the time schedule** for your watering zone. **See map and legend below.**
- 3. Always follow Nassau County's Odd/Even Watering Ordinance**
 - **No watering** between **10 AM** and **4 PM**
 - **Odd numbered homes** water only on **odd numbered days**
 - **Even and non-numbered homes** water only on **even numbered days**
- 4. Always check for broken sprinkler heads** or leaks that waste water.

Thank you for your cooperation and for being part of the solution!

JERICHO WATER DISTRICT IRRIGATION SCHEDULE - SUMMER OF 2020

Watering is permitted in either AM or PM, as delineated below: See map to determine your zone.

- **Zones 1 & 5:** Between **12:00 AM** and **3:00 AM**... **OR...** between **4:00 PM** and **6:40 PM**.
